Institute of the Balearic Islands
(IdISBa), University of the
Balearic Islands, 07122 Palma de
Mallorca, Spain

Deadline for manuscript
submissions:

25 May 2024

Message from the Guest Editor

We are inviting contributions to a Special Issue of *Nutrients* focusing on the "The Role of Diet and Nutrients in the Management of Different Types of Kidney Stones." This Special Issue aims to provide a comprehensive platform for researchers and healthcare professionals to share their latest findings, insights, and innovative approaches in the field of renal stone disease management.

Dietary studies have played a significant role in the management and prevention of different types of kidney stones. These studies have helped identify specific dietary interventions and nutritional approaches that can reduce the risk of stone formation or help manage the recurrence of kidney stones.

This Special Issue will cover a wide range of topics related to diet, nutrition, and their impact on various types of renal stone diseases.

We encourage researchers, clinicians, and experts in the field to submit their original research articles and reviews to this Special Issue. All submissions will undergo rigorous peer review to ensure the highest scientific quality.

We look forward to your submissions.
