Deadline for manuscript
submissions:
closed (20 August 2022)

Message from the Guest Editors

Dear Colleagues,

We are excited to invite you to submit research manuscripts utilising the new digital dietary assessment technologies to collect food and beverage data from populations. The types of tools might be automated recalls, image capture for assessing food intake, apps for prospective recording of food intake or digital food frequency instruments. We are interested to see how they have been used to further the study of dietary intake patterns across time, throughout the lifecycle and in different countries. The use of tools in low- and middle-income countries is of special interest in addition to their use in higher-income countries. With this Special Issue, we hope to assemble data from across the world to understand dietary patterns and how they are influencing global health outcomes. We welcome original research articles, systematic and scoping reviews and meta-analyses. Research in both healthy populations and various subgroups with disease states is of interest.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
