Message from the Guest Editor

Dear Colleagues,

Nutrients is planning a Special Issue on the potential role of vitamin D in COVID-19 and other emerging or re-emerging viral infections. Vitamin D is important for the regulation of molecular, cellular, and organismal responses to infection. An increasing number of observational studies have linked vitamin D status to COVID-19 and other viral infections, and an increased vitamin D intake has been suggested for the prevention and even as supplementary treatment of infection diseases. However, understanding of vitamin D functioning in the viral infection processes is lacking. Health professionals receive contradictory messages regarding optimal vitamin D status and recommended vitamin D intake in COVID-19 and other infections. These considerations warrant a Special Issue on vitamin D to include current research on the role of vitamin D in emerging or re-emerging viral infections. Manuscripts presenting basic, applied, and clinical research, observational and meta-analysis studies, and analytical reviews are encouraged in this Special Issue

Prof. Dr. Maria Luz Fernandez

Department of Nutritional
Sciences, University of
Connecticut, Storrs, CT 06269,
USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
