and Rehabilitation Science,
School of Kinesiology and
Physical Therapy University of
Central Florida, 12494 University
Blvd., Orlando, FL 32816, USA

Deadline for manuscript
submissions:

closed (5 February 2024)

Message from the Guest Editors

Dear Colleagues,

Our 2021 Special Issue on Creatine Supplementation for Health and Clinical Diseases was a great success, publishing 28 papers from leading creatine scholars and an MDPI book. Invited papers were also presented at the 2022 Creatine Conference in Health and Disease Throughout the Lifetime. Due to the success of that previous Special Issue, *Nutrients* has asked us to extend this effort by editing this Special Issue that will publish additional comprehensive reviews and original research studies evaluating the impact of creatine supplementation on health, performance, disease management, and rehabilitation. While those who participated and/or attended the online conference will receive a 10% discount on article processing fees for publishing their work in this Special Issue, we invite all scholars doing research on creatine to submit their work to this Special Issue. We plan to publish papers submitted to this Special Issue in a special topics book of selected 2023–2024 publications.
