Message from the Guest Editor

We are seeking manuscripts across the translational spectrum related to sarcopenic obesity—specifically looking at biological variables, epidemiological associations, and long-term clinical outcomes as a result of multicomponent interventions. These may be full-length manuscripts, systematic reviews, clinical reviews, and other potential manuscript-types relevant to this topic. Of special interest will be contributions focusing on the importance of diet in the development of sarcopenic obesity and the impact of diet on relevant outcomes in this population.
