Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to explore the use of innovative approaches in dentistry and maxillofacial surgery.

Our goal is to receive and publish systematic and narrative reviews, randomized controlled trials, prospective and retrospective studies, as well as case reports prepared in accordance to the EQUATOR guidelines. The main topics for the Special Issue are presented below:

- Dental anomalies: natal and neonatal teeth, supernumerary teeth, odontomas and hamartomas, ectopic eruption, hyperdontia, hypodontia, tooth-shape-related anomalies.
- Special care dentistry: hospital dentistry, pain management, rare syndromes and chromosomal anomalies, special-need patients.
- Preventive orthodontics: obstructive sleep apnea syndrome, interceptive orthodontics, clear aligners, functional orthopedics, orthodontic extrusion.
- Digital technologies: 3D imaging, micro computerized-tomography analysis, radiographic assessment, fractal analysis, cephalometry, 3D analysis of digital dental models, SEM analysis.
