Bloodstream Infections

Guest Editor:

Dr. Ching-Chi Lee

Clinical Medicine Research Center, National Cheng Kung University Hospital, No. 138, Sheng Li Road, Tainan 70403, Taiwan

Deadline for manuscript submissions:

closed (15 December 2022)

Message from the Guest Editor

The aim of the current Special Issue is to collect, update, and harmonize the most recent literature on BSIs. We aim to touch herein the updated epidemiologic aspects of BSIs as well as their diagnosis and treatments, spanning from the understanding of the molecular mechanisms involved in pathogenesis, to the recapitulation of the host immune responses, to the analysis of available biomolecular tools for early diagnoses, and to the latest advancements in antimicrobial discovery.

As the Guest Editor of a Special Issue of *Pathogens* focused on BSIs, I invite you, as an expert in this field, to submit a manuscript for publication, in terms of original research, review articles, or short communications that report on recent progress to further expand host–pathogen knowledge.

Editor-in-Chief

Prof. Dr. Lawrence S. YoungWarwick Medical School, University of Warwick, Coventry CV4 7AL, UK

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
