Deadline for manuscript
submissions:

closed (31 August 2020)

Message from the Guest Editor

This Special Issue will focus on:

- Mechanism of viral replication or recombination (e.g. antibody-dependent enhancement).
- Virus-host interaction (e.g. FIP-related soluble mediators).
- Virulence factor of pathogen.
- Development of therapeutic, preventive, and diagnostic method (e.g. novel diagnosis markers).
- Latest findings except those mentioned above (e.g. animal models excluding cats).

We invite you to submit either an original research or an insightful and suggestive review.

an Open Access Journal by MDPI

CV4 7AL, UK

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
