Sciences and Veterinary Public
Health, Swedish University of
Agricultural Sciences, 750 07
Uppsala, Sweden

Deadline for manuscript
submissions:

closed (30 April 2023)

Message from the Guest Editor

In this Special Issue, we invite researchers to submit reviews or original contributions within the area of disease surveillance, prevention, and control, focusing on infectious animal diseases with significant impact on society. Subjects that may be addressed include the application of new scientific tools to old issues, or old tools to new issues, in the context of population-level management of animal diseases that cause significant mortality and/or production losses, or affect human health. Technical advances, governance, systematic approaches, socioeconomics, statistical and epidemiological models, and other aspects related to infectious animal diseases and their management are all relevant for this Issue, which will take a transdisciplinary approach to the various aspects of infectious animal diseases.

We look forward to your contributions.

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
