

Emerging Viruses and the Role of the Virome in Human Health and Diseases

Guest Editors:

Prof. Dr. Wen Zhang

School of Medicine, Jiangsu
University, Zhenjiang, China

Dr. Yanpeng Li

Shanghai Public Health Clinical
Center, Fudan University,
Shanghai, China

Dr. Eda Altan

Institute of Biomedicine Research
Center Infections and Immunity,
University of Turku, Turku,
Finland

Deadline for manuscript
submissions:

closed (31 January 2024)

Message from the Guest Editors

This Special Issue of *Pathogens* calls for all types of research articles, reviews, and short letters related to virome studies, including the evolution, transmission pathways, and pathogenesis of emerging viruses, virus discovery, virus–host interactions, and basic and clinical research related to the human virome. We look forward to your contributions.

Keywords:

- virome;
- emerging viruses;
- virus evolution;
- biosafety;
- virus–host interaction

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
