submissions:

closed (31 March 2023)

Message from the Guest Editor

Dear Colleagues,

Taking into account the importance of pig and poultry production in numerous countries of Europe, this Special Issue of *Pathogens* will discuss the most important topics related to poultry and swine viral diseases, including the aspects of epidemiology, diagnostics, prevention, and control. Therefore, I would like cordially to invite you to submit your relevant papers to this Special Issue of our journal. Your valuable input will enrich the current state of knowledge and practical approaches to epidemiology, diagnosis, and a better understanding of pig and poultry viral diseases.

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
