Message from the Guest Editor

Dear Colleagues,

Over the last two decades, the critical role of vitamin D in brain development and function has been highlighted. This neurosteroid has been implicated in proliferation, differentiation, maturation, and neuronal survival. In addition, its neuromodulatory properties on serotonergic, glutamatergic, and dopaminergic neurotransmission have also been reported, and its neuroprotective effects related to anti-inflammatory and antioxidant functions have been the subject of extensive research. Particularly, vitamin D deficiency has been investigated as a risk factor for depression and anxiety. In this regard, several studies have examined the potential of vitamin D as an antidepressant and anxiolytic strategy. However, the mechanisms underlying the antidepressant and anxiolytic effects of vitamin D have not yet been fully elucidated. This Special Issue aims to highlight innovative studies investigating the possible mechanisms underlying the beneficial effects of vitamin D for depression and anxiety. Original research articles and review papers dealing with the efficacy of vitamin D supplementation for the treatment of depression and anxiety disorders are welcome.

Message from the Editor-in-Chief

Because of your expertise in the field of drug sciences, I kindly invite you to consider publishing your current work, in the form of a research article or a review, in the open access electronic journal *Pharmaceuticals*.

Pharmaceuticals is characterized by an active editorial board and a dynamic editorial staff. Manuscripts are peer-reviewed and a final decision is provided to authors within 4–6 weeks after submission. Papers are published on the web immediately after acceptance. For details on the submission process or any other matter, please do not hesitate to contact us.

We hope to handle your contribution to *Pharmaceuticals* soon.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Pharmaceutical Science*)
