### Message from the Guest Editor

Antiviral agents are useful in tackling viral diseases where there is a lack of an effective vaccine or infection has already taken place. The viral cycle uses the host cell metabolism to replicate, and drug targets which are restricted to the virus are limited. Thus, the search for effective and selective antiviral compounds is an urgent. Our Special Issue celebrates natural and synthetic antiviral compounds with effects evaluated by phenotypical and molecular assays.

Deadline for manuscript submissions:

**30 November 2024**

an Open Access Journal by MDPI
