Message from the Guest Editors

Dear Colleagues,

The therapeutic applications of biomolecules, carbohydrates, peptides and nucleic acids have attracted much attention in recent decades. They have proven to be excellent candidates for the development of specific drugs to fight a wide variety of diseases. Advances have been achieved in the development of therapeutic strategies based on biomolecules, as well as strategies for the administration of biomolecules as drugs. This Special Issue aims to show, through high-quality review articles, the current state-of-the-art research of this interesting field. Therefore, we invite authors to contribute high-quality review articles covering all different aspects of the application and use of biomolecules as therapeutic drugs.
