

Recent Advances in the Application of Biomaterials in Drug Delivery and Regenerative Medicines

Guest Editors:

Dr. Seyed Ebrahim Alavi

School of Medicine and Dentistry,
Griffith University, Brisbane, QLD
4215, Australia

Dr. Aun Raza

School of Pharmacy, The
University of Queensland,
Woolloongabba 4102, Australia

Deadline for manuscript
submissions:

closed (31 October 2023)

Message from the Guest Editors

Biomaterial advances have allowed significant progress in biology and medicine, with biomaterials becoming increasingly important for drug delivery, tissue engineering, and new clinical treatments. However, that materials be designed that support and guide cells during healing and remodeling processes in regenerative medicine. A number of advanced tissue engineering systems work in conjunction with bioactive agents to enhance tissue regeneration by modulating the cellular environment. Bioactive agents include, for example, small molecules, bioactive ions, genes, cells, and growth factors applied either singly or simultaneously to a target. In many cases, bioactive agents must act intracellularly at the molecular level due to their sensitivity to the surrounding environment. It is therefore required to provide a suitable carrier, such as hydrogels, bioceramics, electrospun fibers, nano/microparticles, or genetically modified cells, in order for these agents to be effective. It is also important to emphasize that such local or site-specific smart drug delivery systems are highly successful because they combine active agents, cells, biomaterials, and nanotechnologies efficiently.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Department of Pharmaceutics,
Ernest Mario School of
Pharmacy, Rutgers University,
Piscataway, NJ 08854, USA

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
