Message from the Guest Editor

Dear Colleagues,

Overcoming the blood–brain barrier (BBB) to efficiently deliver theranostics to the brain will revolutionize the diagnosis and treatment of neurological disorders.

In this Special Issue, original research articles and reviews are welcome in research areas including (but not limited to): brain endothelial cell physiology specialization (e.g., tight junction stability, cell-surface protein dynamics, glycocalyx variations, endocytic activity modulation, arterio-venous differentiation); cell trafficking mechanisms governing transcytosis (e.g., ligand–receptor affinity, intracellular protein mediators, vesicular tubulation, endosomal escape); modulation of BBB function by the neurovascular unit; and innovative drug delivery strategies exploiting these characteristics.

We aim to establish a focus point to foment the development of next-generation brain targeting strategies which embrace the physiology of the BBB for the improved delivery of therapies into the brain.

I look forward to receiving your contributions.

Dr. Daniel Gonzalez Carter

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
