Deadline for manuscript
submissions:

20 September 2024

Message from the Guest Editor

In recent years, there has been a growing trend in utilizing lipid-prodrug-based nanoassemblies (LPNs) for drug delivery, which have gained popularity due to their numerous advantages. A typical lipid prodrug encompasses a lipid carrier material, native drug, and a chemical spacer that possesses the potential to respond to stimuli. Through hydrophilic and hydrophobic interactions, lipid prodrugs spontaneously form supramolecular structures when introduced to aqueous environments. LPNs offer a combination of benefits derived from prodrugs and nanoparticles, facilitating drug release in response to stimuli while improving drug stability, bioavailability, and intracellular delivery.

The objective of this Special Issue of *Pharmaceutics* is to compile original research and review papers that focus on the development of lipid-prodrug-based nano-drug delivery systems for effectively treating severe diseases such as cancer, neurological disorders, infectious diseases, and uncontrolled inflammation.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
