Message from the Guest Editor

Dear Colleagues,

Since oral administration of drugs remains the route of choice for numerous drugs, intestinal permeability of orally administered drugs has been widely used to determine the rate and extent of intestinal absorption of drugs. Solubility, dissolution, and gastrointestinal physiology, including transit, pH condition, and mechanisms for gut metabolism and transport, could also affect the intestinal absorption of orally administered drugs.

Several strategies have been developed to estimate the oral bioavailability of drugs and to understand or overcome the issues associated with low oral bioavailability. The implementation of in situ, in vitro, and in silico methods, followed by in vivo evaluation, can guide to obtain the acceptable oral bioavailability in the drug development and formulation process.

This Special Issue aims to highlight the mechanisms related to low intestinal drug absorption, the strategies to overcome the obstacles or intestinal drug absorption, and in situ, in vitro, and in silico methodologies to predict intestinal drug absorption.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
