Message from the Guest Editors

Dear Colleagues,

We pleased to invite you to a Special Issue of *Pharmaceutics* (MDPI) entitled “Application of Metal-Based Complexes in Cancer Treatment”. The aim of this Special Issue is to compile the most recent innovative approaches on metallodrugs that include the design of new molecules with particular properties that may improve cancer treatment. The manuscripts can present studies of new targets, mechanisms of action, molecular and cellular studies, omics advances and differential gene expression, among other mechanisms. High-quality original research articles and reviews are welcome. Any approach to improve cancer treatment with a special type of formulation in order to preserve the activity of metallodrugs for cancer treatment is of interest. Research areas of this SI may include (but are not limited to) the following:

1. Adult tumors;
2. Child tumors;
3. Essential metals;
4. Non-essential metals.

We look forward to receiving your contributions.

- metallodrugs
- mechanism of action
- targets
- pharmaceutical formulation

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
