submissions:  
**closed (31 December 2023)**

### Message from the Guest Editors

Dear Colleagues,

Nanotechnology is a relatively new field with the potential to create new technology for more accurate and efficient cancer treatment and diagnosis. Nanotechnology deals with developing nanomaterials with a high surface area-to-volume ratio and possessing unique optical, magnetic, and electrical properties. Nanotechnology utilizes a wide array of materials ranging from biological to synthetic origins, to fabricate tiny particles, which have excellent abilities in terms of physicochemical properties and is widely being studied to illustrate their biological interactions. Multiple approaches have been studied, including size-based efficiency and surface property-mediated proficiency and so on, examined to control the progression of cancer effectively. Nanotechnology-derived immunotherapy depicts an exceptional ability in suppressing cancer development; however, there is a long way to go to attain side-effect-free effective nanotoxic materials for the treatment of diverse cancer diseases. The goal of this Special Issue is to document developments in nanomaterials for cancer therapy and diagnosis.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
