Message from the Guest Editors

Treatment of diabetes, particularly type 2 diabetes, is a growing field. In the last decade, we have gone on an interesting path, from glucocentricity to ever-evolving targeted diabetes therapies aimed at the reduction of chronic complications per se, above all, reducing morbidity and mortality from cardiovascular disorders. In recent years, the protection of target organs, particularly cardiovascular and kidney protection, with antidiabetic drugs have been found to be very important regardless of glycemic control. However, as the field evolves, new questions are emerging, and therefore answers are needed. To answer questions from our daily clinical practice and open new ones, we have created this Special Issue.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
