Message from the Guest Editors

Dear Colleagues,

Statistical approaches using efficient experiment designs are often used to optimize and expedite pharmaceutical product development, an otherwise time-consuming process. Furthermore, the current approach to enhancing rather than testing product quality is useful at multiple levels. This themed issue will consider manuscripts in all areas of product development, including drug design, processes, formulation and product optimization, as well as quality control, in which a quality-by-design approach is at the forefront of the research.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
