### Message from the Guest Editors

Dear Colleagues,

Currently, the field of medicine is drastically increasing its results, mainly due to the progress in emerging areas such as nanomedicine, regenerative medicine, and personalized medicine. For example, the development of novel drug delivery systems in the form of nanoparticles is improving the LADME (liberation, absorption, distribution, metabolism and excretion) properties of the derived formulations, with a consequent enhancement of the treatment efficacy, a reduction in the secondary effects, and a better compliance with the dosage guidelines. On the other hand, the utilization of biocompatible scaffolds is translating into the possibility of regenerating biological tissues. Additionally, personalized medicine is benefiting from the advantages offered by additive manufacturing. However, all these areas have in common the need to develop novel materials or composites that fulfill the requirements of each application.

Therefore, this Special Issue aims to identify novel materials/composites that have been developed with specific characteristics to accomplish the biomedical application for which they were designed.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
