Message from the Guest Editor

Dear Colleagues,

Neurological disorders have been a challenge to target therapeutically given the presence of the blood–brain barrier (BBB). Blood–brain barrier (BBB)/Neurovascular unit (NVU) integrity is vital to the health of the central nervous system (CNS) and serves as the gateway for CNS drug delivery. However, the influence of pathological changes on BBB dynamics and ultimately on brain drug development is oft overlooked. Thus, it is important to the clinical success of new CNS-targeting agents to account for pathological changes, as well as those resulting from aging and sex differences, to fully understand BBB integrity, its impact on drug delivery, and how these issues will be addressed in the future.

The aim of this Special Issue of *Pharmaceutics* is to collect research and review papers on targeting the CNS during disease by understanding the role of the BBB in drug discovery and development. We welcome articles dealing with any aspect of BBB dynamics during physiological and pathophysiological states on CNS drug delivery.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
