

Innovative In Vitro/In Silico Approaches to Drug Permeation and Absorption: The Highway to Implement the 3Rs Principles in Drug Development

Guest Editor:

Dr. Massimiliano Pio di Cagno

Department of Pharmacy,
Faculty of Mathematics and
Natural Sciences, University of
Oslo, Sem Sælands vei 3, 0371
Oslo, Norway

Deadline for manuscript
submissions:

20 January 2024

Message from the Guest Editor

The 3Rs (*Replacement, Reduction and Refinement*) are the guiding principles for a more ethical use of animals in product testing and scientific research. These guiding principles were first spelled out as a firm legal requirement by the EU commission in the Directive 2010/63/EU on the protection of animals used for scientific purposes. Yet, 12 years on from its legal implementation, the number of animals used in pharmaceutical research has not declined. This fact does not only create a big ethical/sustainability issue, but it also raises the question: is this the correct approach to understanding complex biopharmaceutic phenomena such as drug permeation and adsorption? The answer is: probably not. This Special Issue serves to highlight and capture the contemporary progress in in vitro/in silico approaches for the reliable prediction of in vivo drug performance with special emphasis on enabling formulation testing.

Pharmacy, Rutgers University,
Piscataway, NJ 08854, USA

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
