### Message from the Guest Editor

In the last few decades, there have been extensive efforts to develop novel systems for the encapsulation of active molecules in nano- and microparticulate systems. The particulate systems are designed to deliver encapsulated active molecules to a specific site for achieving improved therapeutic effects and reduced adverse effects.

Recently, many patients are suffering from chronic diseases and tend to take multiple pills to manage the diseases. In view of this, an encapsulation of multiple drugs in a single carrier has been developed to provide better patient compliance as well as therapeutic effects. Since an encapsulation of single or multiple molecules in delivery systems is affected by diverse factors, numerous studies have been conducted to establish the optimization of the preparation procedures.

The aim of this Special Issue is to gather current research progress and outputs in nano- and microparticles for drug delivery purposes. Articles that describe physicochemical properties, release profiles, in vitro cellular studies, and in vivo animal works are welcome.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (Pharmaceutical Science)
