### Message from the Guest Editors

Dear Colleagues,

The development of molecular imaging agents for interrogating the immune system is an important area of research with potential applications in a variety of fields. This includes, but is not limited to, understanding inflammation and the ageing immune system (“inflammaging”), interrogating biological responses to bacterial and viral infection, as well as monitoring cancer patients’ response to immunotherapy. A greater understanding of our immune system, and tools to interrogate immune response in patients, could open possibilities for new therapeutics for a range of immune-related diseases and conditions, in addition to imaging biomarkers.

We are pleased to invite you to contribute original research articles and reviews to our Special Issue. We aim to form a collection of the latest advancements in the field and hope the Issue will transcend scientific disciplines and imaging modalities.

We look forward to receiving your contributions.

Prof. Dr. Steve J. Archibald

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
