Message from the Guest Editor

Dear Colleagues,

Several technologies have evolved in the past 10 years for the development of micro and nano systems for drug carry and delivery; they allow the production of a huge amount of advanced biomaterials very promising for both pharmaceutical and biomedical fields. On the other hand, an accurate device formulation and engineering, its size tailoring and encapsulation efficiency are, in several cases, still a technological challenge of the next future.

From nanovesicles and nanosomes up to micro/nano biopolymer systems, the special issue will explore the different solutions adopted and the several approaches attempted to formulate complex micro/nano devices for active principle storage and delivery versus specific target. Expert panel from both industry and academia with a primary emphasis on addressing the needs and interests of both academic and industrial readers are welcome in order to explore how the research field is evolving and what the future might bring.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
