Message from the Guest Editors

The local delivery of active molecules is an excellent strategy to bypass biological barriers, obtaining targeted efficacy at reduced doses and with limited side effects. Nanocarriers can be used to deliver the active molecules in order to increase their stability, avoid drug resistance mechanisms, or selectively target certain cell populations. Moreover, nanomedicines can have intrinsic properties that allow them to adapt and adhere to the target site, induce sustained or environmental triggered drug release, or enhance their penetration depth into biological tissues.

In this Special Issue, we aim to collect articles regarding this topic in order to demonstrate the potential of this drug delivery strategy in a wide range of applications (from cancer treatment to gene therapy, from intracerebral to intra-articular drug delivery).

Deadline for manuscript
submissions:

closed (20 November 2021)

- nanomedicine
- drug delivery
- local delivery
- active molecules
- biomaterials
- sustained release
- targeted medicine
- drug absorption
- permeability
- biological barriers
- theranostics
- local treatment
- nanocarriers

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Department of Pharmaceutics,
Ernest Mario School of
Pharmacy, Rutgers University,
Piscataway, NJ 08854, USA

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
