Message from the Guest Editor

Dear Colleagues,

This Special Issue aims to summarize recent trends in the use of phospholipids in the field of drug delivery. In addition to recent research on liposomal and related nanoparticular formulations as intravenous drug carriers, the major aim of this Issue is to explore the utility of phospholipids in alternative formulations and administration routes, addressing major challenges in current drug development such as poor bioavailability (e.g., hydrophobic small molecules) as well as the formulation of large molecules (e.g., proteins and nucleic acids). In addition, the use of phospholipids in models for in vitro testing (e.g., permeability) and relevant characterization issues (e.g., drug release) will be addressed.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
