Message from the Guest Editor

Dear Colleagues,

Stimuli-responsive nanogels are nanoscopic polymeric materials able to modify their physico-chemical properties in response to the application of endogenous or exogenous signals. These kinds of materials—characterized by high stability and loading ability—together with biologic consistence and high permeation capability, have attracted increasing interest thanks to the subsequent opportunity to obtain delivery systems in which the carrier assumes an active role in the drug delivery process, enabling the optimization of disease therapy. Internal (pH and temperature variations, ROS production, redox potential, enzymes, and glucose) or external (light, electric, or magnetic fields) microenvironmental factors, or a combination of both, can stimulate the response of nanogels, and are useful for the controlled release of bioactive compounds such as drug, genetic materials, or proteins.

This Special Issue is devoted to the most recent developments in the synthesis and characterization of stimuli-responsive nanogels for drug delivery.

Original research papers, communications, or review articles are welcome.

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
