Message from the Guest Editors

Women's health issues represent a major concern in both research and medical practice. Often dismissed, the specific health needs of women have been underappreciated and targeted scientific research is lacking.

We are focusing this special issue on innovative drug formulation and drug delivery systems that can help address the unmet health needs of women worldwide. Importantly, user acceptability is a key attribute that must be incorporated early in the design and testing of any new delivery system.

Non-gender-specific implantable, injectable, oral, and topical dosage forms can potentially address the unmet needs for women's health. Meanwhile, cis female-specific products such as vaginally administered fast dissolving inserts, gels, and intravaginal rings can have favorable pharmacological profiles and high user acceptability.

We are interested in drug delivery systems that address a wide range of women's health needs including vaginal health; contraception and pregnancy; sexually transmitted infections; and genitourinary symptoms of menopause. We encourage submissions that address other women's health issues as well.

an Open Access Journal by MDPI

Pharmacy, Rutgers University,
Piscataway, NJ 08854, USA

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
