Pharmacy, Chapel Hill, NC, USA

Message from the Guest Editors

Medication management is an overarching term used to describe services aimed at optimizing medication use. Medication management may include patient education; medication reconciliation; medication evaluation; and medication optimization through patient education, communication with other health care providers, and utilization of adherence tools. Pharmacists have extensive knowledge of the evidence-based use of medications and safety, communication strategies that optimize interprofessional work, and patient education techniques. This knowledge base optimally positions pharmacists to provide medication management.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Pharmacy* (ISSN 2226-4787). *Pharmacy*, an international scientific open access journal on pharmacy education and practice, is published by MDPI online quarterly. *Pharmacy* is published in open access format—research articles, reviews and other contents are released on the Internet immediately after acceptance.

The scientific community and the general public have unlimited and free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.6 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2023).
