Deadline for manuscript
submissions:

closed (30 October 2023)

Message from the Guest Editor

Dear Colleagues,

Terpenoids are one of the largest groups of secondary metabolites in plants. Traditionally, specialized terpenoids are used as natural flavor and aroma compounds, which have a long history of human utilization. Moreover, the ecological functions of terpenoids as signals during plant–environment interactions have gained increased attention. Exploiting the molecular mechanism of the biosynthesis and regulation of terpenoids could uncover compounds of greater use, improve the content of metabolites derived by exogenous elicitors, or create plants with enhanced resistance by molecular breeding. This Special Issue of *Plants* will highlight the function, regulation, and diversity of plant terpenoids and their roles in the interactions of plants with their environment.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science,
University of Manitoba, Winnipeg,
MB R3T 2N2, Canada

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Plant Sciences*) / CiteScore - Q1 (*Plant Science*)
