Deadline for manuscript  
submissions:

**closed (31 March 2022)**

### Message from the Guest Editors

Dear Colleagues,

Both commonly used species, common buckwheat (*Fagopyrum esculentum* Moench) and Tartary buckwheat (*Fagopyrum tataricum* (L.) Gaertn.), have been traditionally used in human nutrition. Efforts have been made to improve the nutritional value of buckwheat by breeding. Flavonoids and other phenolic substances from buckwheat are important for preserving health. Flavonoids act as antioxidants, lowering cholesterol, and have a positive effect on human blood pressure. When it comes to plants, flavonoids protect vulnerable tissues from UV radiation, oxidative stress, and herbivory. Among buckwheat species and cultivars, there are differences in the content of flavonoids. The concentration of flavonoids depends on genotype, phenological phases, climate conditions, year of growing and harvest, storage, and other factors. Different plant parts accumulate various flavonoid contents. Conditions such as UV radiation, drought, and the addition of minerals increase the accumulation of flavonoids by stimulating their synthesis through the phenylpropanoid pathway.

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Plant Sciences*) / CiteScore - Q1 (*Plant Science*)
