submissions:

closed (28 February 2021)

Message from the Guest Editors

Dear Colleagues,

Essential oils are important for the plants that produce them as well as the humans that have learnt to extract and use them since the beginning of civilization. Nowadays, their constituent secondary metabolites are not only very important for the fragrance industry but also for the chemical and pharmaceutical industries. Essential oils have numerous uses and knowledge related to essential oils is implicated in most fields of research: biology, ecology, genetic, conservation, climatic change, medicine, etc. For this Special Issue, we invite you to contribute with papers toward updating the knowledge on this incredible topic.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science,
University of Manitoba, Winnipeg,
MB R3T 2N2, Canada

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Plant Sciences*) / CiteScore - Q1 (*Plant Science*)
