1 December 2024

Message from the Guest Editors

According to the Food and Agriculture Organization of the United Nations (FAO), global trade in tropical fruits has expanded to unprecedented levels in recent years. This has generated improvements in nutrition and substantial income for small producers and for many producing countries through exports. However, pests and diseases represent an important limitation for the production and marketing of tropical fruits and can affect the well-being and food security of thousands of families in developing countries. Research, technological development, and innovation are paths that lead to improvements in the economic, social, and environmental aspects of pest and disease management of tropical fruit crops. This Special Issue of *Plants* will highlight knowledge on the bioecology of pests and diseases of major (e.g., banana, avocado, mango, mangosteen, guava, papaya, citrus, and pineapple) and minor (rambutan, durian, breadfruit, Java apple, lychee, macadamia nut, pili nuts, cherry, passion fruit, among others) tropical fruit crops; the development, application, and evaluation of strategies and tactics for their pest management; and the reduction in the use of agrotoxics.

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Plant Sciences*) / CiteScore - Q1 (*Plant Science*)
