Dr. Hanna Margońska

C411, Dept. of Plant Taxonomy and Nature Conservation, Faculty of Biology, University of Gdańsk, Wita Stwosza 59, PL-80-308 Gdańsk, Poland

Deadline for manuscript submissions:

closed (15 October 2022)

Message from the Guest Editors

The orchid family (Orchidaceae) is the second largest family of flowering plants, which contains about 1,000 genera and almost 35,000-40,000 species and new taxa are still being discovered and described. This Special Issue aims to gather the current knowledge on various aspects of the biology and ecology of orchids, including problems with taxonomy and classification. We invite researchers to submit review articles, full-length original papers, communications, short overviews, or comments presenting the various aspects of orchid biology, ecology, taxonomy and classification, including articles establishing new nomenclature, new taxa and new names. Papers on other aspects of orchid life (also concerning floras, especially in mostly endangered regions, e.g. tropical) may also be published.

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Plant Sciences*) / CiteScore - Q1 (*Plant Science*)
