Message from the Collection Editors

Dear Colleagues,

We are pleased to announce that we are launching a Special Issue of *Plants* entitled "Plant Morphofunctional and Evolutionary Traits under a Climate Change Scenario".

Because the aim of this Special Issue is to illustrate, through selected works, cutting-edge research in "Plant Morphofunctional and Evolutionary Traits under a Climate Change Scenario", we encourage Editorial Board Members of our Section to contribute by sending papers reflecting the latest progress in their research field or to invite relevant experts and colleagues to do so.

In particular (but not exclusively), this Special Issue welcomes high-level manuscripts related to interactions between plants (and/or the abovementioned organisms) as well as the following:

Elevated temperature;

Excess (flooding) and/or lack of water (drought);

Hypoxia and/or anoxia;

Oxidative stress;

CO₂, CH₄, N₂O, and other greenhouse gases;

Tropospheric ozone;

Volatile organic compounds (VOC);

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [PubAg](#), [AGRIS](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Plant Sciences*) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided.

We also encourage timely reviews and commentaries on topics of interest to the plant research community.
