Message from the Guest Editor

Dear Colleagues,

Polymeric films play an increasingly important role in our everyday lives. Properties of thin polymeric films are often determined by the geometric constraints imposed by the presence of surfaces and interfaces. In many cases, the films are of complex composition with different types of polymers and other components such as nanoparticles. Surface processing can be performed as well to cause desirable changes in chemico-physical and physicochemical properties of polymer surfaces.

This Special Issue is dedicated to recent achievements in the field of advanced polymeric films, including synthesis, fabrication, modification, and characterization, with an emphasis on the efficient and large scale production of polymeric films for promising future applications. Papers related not only to pure polymers but also to tailor-made copolymers and composites are welcomed.

Dr. Dalius Jucius

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
