Message from the Guest Editor

Dear Colleagues,

All aspects concerning the synthesis, procedures, and characterization methods for high-performance biopolymers are welcome in this Special Issue. Topics such as protein engineering, tissue engineering, tissue construct and regeneration, and implants can also be addressed if the work reported is focused on biopolymers and the role played by biopolymers to achieve the final aim of the product. Applications of biopolymers in various fields focusing on the relationship between properties and chemical structure are desirable within the proposed papers. Moreover, different types of biopolymers with pre-designed structures which are parts of complex systems can also be the subject of the reported work, as well as the technological issues encountered in developing new biopolymers-based products.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
