Message from the Guest Editor

The Special Issue focuses on the different types of polymer materials from natural resources which are mainly including various polysaccharides and proteins. It discusses the natural polymer materials preparation, performance, and function. Various natural polymers, such as chitosan, alginate, agarose, and collagen, are explained their structure, source and characteristics. Importantly, the applications of the natural polymer materials based on the above polysaccharides and proteins is widely introduced.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
