Materials Science, Fujian Key
Laboratory of Polymer Materials,
Fujian Normal University, Fuzhou
350007, China

Deadline for manuscript
submissions:

closed (25 November 2023)

Message from the Guest Editor

Polymers, particles, and their composites continue to act as popular model systems for the development of new materials, processes, and technologies to meet the increasing demands of new functions for applications in fields that broadly range from daily care to environmental remediation, oil recovery, new energy, life health, soft-robotics, etc. In particular, more and more attention is being focused on high-performance polymers that are also environmentally degradable, readily recyclable, renewable (e.g., vitrimer), or attainable from sustainable resources; on particles that have unique functions with designable structures and programable behaviours; and on polymers/particles (e.g., composites and blends) that have enhanced or new properties with tailorable microstructures and tuneable interactions.

This Special Issue aims to cover the latest advancements in materials, processes, properties, and applications related to polymers, particles, and their mixtures, especially those that are developed based on fundamental understandings of the interfaces between different phases or components.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien
und Polymertechnologie,
University of Potsdam, 14476
Potsdam-Golm, Germany

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
