Message from the Guest Editors

Dear Colleagues,

Developing highly efficient separation and purification technologies for the removal of contaminants from water and wastewater is crucial due to the aggravated water crises. In pursuit of highly efficient water treatment systems, studies on the design and application of advanced functional materials are necessary.

Research pertaining to polymer composites has gained considerable attention in recent years, owing to the opportunities that they can provide for a variety of water treatment technologies. An increasing variety of polymer composites are being investigated for the removal of contaminants and particulate matters in physical, chemical, and biological water treatment processes.

The focus of this Special Issue is on synthesis, development, and application of polymer composites for water treatment, covering different processes, technologies, water sources, and issues encountered in different water remediation systems. High-quality original research and review manuscripts are welcome for submission.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
