Deadline for manuscript  
submissions:

**closed (31 March 2023)**

### Message from the Guest Editor

Dear Colleagues,

The three-dimensional printing technique, also known as additive manufacturing, rapid prototyping, or layered manufacturing, was introduced during the 1980s with the intention of fabricating customized/complex objects without the need to use molds or machining. As a result of the versatile polymer chemistry-related innovations, it has attracted special attention from polymer chemists, material scientists, and engineers, and is widely used in the scientific fields of microfluidics, biomedical devices, soft robotics, surgery, tissue engineering, dentistry, and drug delivery.

The current Special Issue intends to provide a platform to showcase the recent research advances in polymer processing and the development of polymers and advanced polymer systems, specifically for 3D printing.

Dr. Ali Bagheri

Potsdam-Golm, Germany

## Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
