Message from the Guest Editors

Dear Colleagues,

Polymers and their composites are increasingly being applied in extreme environments, such as cryogenic, high-temperature, corrosive, oxidizing or biological environments, to substitute for traditional metal materials in load-bearing applications due to their properties of low density, flexibility, chemical stability, biodegradability and so on.

This Special Issue of Polymers invites contributions addressing several aspects of polymer matrix composites, such as design and preparation of polymers, design and processing of composites, testing methodologies and standards, reliability evaluation and life assessment, etc. The above list is only indicative and by no means exhaustive; any original theoretical or engineering experimental work or review article on the polymer matrix composites used in extreme environments is welcome.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
