### Message from the Guest Editor

Dear Colleagues,

Bioactive polymers for drug delivery and release are an important branch of polymers. Bioactive polymers will play an important role in future medical treatments and diagnostics. Their intrinsic properties enable the development of novel drugs and treatments. For these reasons, research on bioactive polymers for drug delivery has been a hot topic, with rapid progress in medical polymers, as well as in biomedical chemistry, although there are still some difficulties in clinical application.

This Special Issue is dedicated to exploring the contemporary state of bioactive natural and synthetically derived polymers in biomedical fields, such as tissue engineering, regenerative medicine, bioengineering, targeted drug discovery and delivery, implantation, and wound repair and healing.
