Message from the Guest Editor

Dear Colleagues,

Coatings are an essential part of all surfaces, including “living surfaces” like our skin. Coatings have been developed to offer decoration, protection, and different special functions. Polymeric coatings should be made more robust, including with better scratch and mar resistance, enhanced corrosion-resistance, aging and heat resistance, and anti-fingerprint performance. This Special Issue mainly focuses on any one of these aforementioned polymeric materials, composites, and functionalities that can be used to make or render coatings “special”. It also targets professionals, industrial practitioners, as well as researchers and graduate students in the fields of polymers chemistry and engineering, coatings materials science, and chemical engineering that need to know the most recent advances in functional polymer coatings.

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (*Polymer Science*) / CiteScore - Q1 (*Polymers and Plastics*)
