Deadline for manuscript

closed (30 November 2022)

Message from the Guest Editors

The development of artificial biopolymer implants with a micro-nano spatial topology structure is playing an important role in clinical applications today—for example, restoring biology function, promoting tissue regeneration, and facilitating wound healing. However, the properties and performance of these artificial biopolymer implants still need to be further improved due to the unpredictable responses of the body to biopolymers and the complicated interactions with the components in living systems. The scope of this Special Issue encompasses new concepts in the preparation and evaluation of artificial biopolymer implants with a micro-nano spatial topology structure, studies into the interaction of this kind of artificial implants with cells, tissues, and the body, and the use of topological biomaterials to answer fundamental biological questions in vitro and in vivo

## **Editor-in-Chief**

#### Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of Potsdam, 14476 Potsdam-Golm, Germany

#### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and highquality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (Polymers and Plastics)
