Deadline for manuscript  
submissions:

**31 August 2024**

### Message from the Guest Editors

Dear Colleagues,

Over the past decades, zeolites have found use as adsorbents, ion exchangers, and catalysts. This is primarily due to their numerous and unique characteristics, among which are their thermal stability and resistance to aggressive environments. Among the advantages of zeolites as catalysts are their shape-selectivity and the possibility of introducing heteroatoms into their structure, expanding the range of zeolite applications. In this Special Issue, we would like to focus on issues related to the synthesis of new types of zeolite materials and mesoporous materials containing zeolite domains.

The topics of this Special Issue will focus on:

- The synthesis and modification of zeolite catalysts.
- The preparation of zeolite–organic composite materials and their application as catalysts.
- The preparation of micromesoporous materials and the possibilities of their application in catalytic reactions.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
